Hand crafted by master cheesemaker Christian Oberli at Kaserei Oberli, Usi Minnie is made in the style of Alpine Mutschli. Mutschli cheeses are made in high Alpine daries in the Summer of curds left over from the production of Gruyere or Bergkase.

Product Description

These small wheels are traditionally made by the family of the cheesemaker in small vats or on stovetops. After a short aging period, Mutschil are to be shared with guests who bring supplies, newspapers and updates from the village below, usually on Sunday.

This version, produced at Christian Oberli's Rislen Dairy is evocative of these intimate historical moments, with it's richly creamy and dense paste giving mild fresh and yogurty tones above its hint of grassy finish.

Kaserei Oberli was originally built in 1918 and engaged primarily in the production of Emmentaler cheese for export

production of Emmentaler cheese for export. When the family passed the dairy to the second generation, they began the transition to Tilsiter cheesemaking, and they produced this cheese exclusively until 1998, when the increasing consolidation and industrialization of some AOP cheeses influenced third generation Christian Oberli to diversify his production.

Now the dairy is well known for their Schweizer Gold, their range of Raclette and their new Sennenkase, produced in two vats in the newly updated dairy.
